Green in the City

BEFORE YOU LOOK

1. What types of green spaces or elements do you imagine being integrated into an urban environment?
2. How might the image depict the coexistence of nature and city life?
3. What benefits or challenges do you associate with bringing more greenery into urban areas?

This image showcases a bustling city park, a vibrant hub of activity and tranquility in the heart of a dense urban area. Surrounded by towering buildings, the park serves as a vital green space where people of all ages and backgrounds come together. Children play energetically on playground equipment while adults relax and socialize, highlighting the park's role as both a community gathering spot and a personal retreat from the urban environment.
