Waters of Wellness

BEFORE YOU LOOK

1. What do you imagine when you think of water as a source of wellness?
2. How might the image capture the healing or rejuvenating properties of water?
3. What personal or cultural connections do you have with the idea of wellness through water?

The image depicts a rural scene, where a portable, solar-powered water purification device plays a central role. With only a couple of villagers interacting with the device by the riverbank, the setting is enhanced by traditional village houses in the background. This scene illustrates the critical impact of accessible and sustainable technology on the health and well-being of rural communities.
